Top 50 edge labels by connectivity

Total edges

pathway
Adaptive Immune System
Post-translational protein modification
Nervous system development
G2/M Checkpoints
CHD3, CHD4, CHD5 subfamily
Extracellular matrix organization
Viral Infection Pathways
Interferon Signaling
Transcriptional Regulation by TP53
Cell-cell junction organization
Metabolism
MAPK1/MAPK3 signaling
Immune System
RAB GEFs exchange GTP for GDP on RABs
Autophagy
Membrane Trafficking
Signaling by TGF-beta Receptor Complex
Signaling by Interleukins
ESR-mediated signaling
Parasitic Infection Pathways
MTOR signalling
Signaling by the B Cell Receptor (BCR)
PI3K-Akt signaling pathway - Homo sapiens (human)
DNA Double-Strand Break Repair
COPI-dependent Golgi-to-ER retrograde traffic
DNA Damage Bypass
Nuclear RNA decay
Signaling by GPCR
RIG-I-like receptor signaling pathway - Homo sapiens (human)
Selective autophagy
MyD88:MAL(TIRAP) cascade initiated on plasma membrane
Endosomal Sorting Complex Required For Transport (ESCRT)
Downregulation of TGF-beta receptor signaling
DNA Repair
Intra-Golgi and retrograde Golgi-to-ER traffic
RHO GTPase cycle
Respiratory electron transport
Transcriptional regulation by RUNX1
Transport of small molecules
Metabolism of lipids
Gene expression (Transcription)
Leishmania phagocytosis
Formation of the beta-catenin:TCF transactivating complex
SWI/SNF chromatin remodelers
Peroxisomal protein import
Diseases of mitotic cell cycle
Negative regulation of MAPK pathway
Myogenesis
Generic Transcription Pathway

pathway
ligand_receptor

0.0 0.5 1.0 1.5 2.0 2.5
Total edges
1e7

Unique cell-type pairs

Muscle contraction
MAPK1/MAPK3 signaling
Myogenesis
Parasitic Infection Pathways
Post-translational protein modification
Interferon Signaling
Negative regulation of MAPK pathway
Nervous system development
pathway
Adaptive Immune System
PI3K-Akt signaling pathway - Homo sapiens (human)
Signaling by Interleukins
Death Receptor Signaling
Extracellular matrix organization
Cell-cell junction organization
Viral Infection Pathways
CHD3, CHD4, CHD5 subfamily
Metabolism
Transcriptional regulation by RUNX1
VEGFA-VEGFR2 Pathway
MyD88:MAL(TIRAP) cascade initiated on plasma membrane
Immune System
Glutamate binding, activation of AMPA receptors and synaptic plasticity
G2/M Checkpoints
Proteoglycans in cancer - Homo sapiens (human)
Signaling by GPCR
Signaling by VEGF
Signaling by WNT
RNA Polymerase II Transcription
Neurexins and neuroligins
Opioid Signalling
Macroautophagy
Transport of small molecules
Chronic myeloid leukemia - Homo sapiens (human)
Selective autophagy
Transcriptional Regulation by TP53
Membrane Trafficking
Signaling by Receptor Tyrosine Kinases
Bacterial Infection Pathways
Cellular responses to mechanical stimuli
Signalling to ERKs
Neuronal System
Cilium Assembly
Human immunodeficiency virus 1 infection - Homo sapiens (human)
Regulation of BACH1 activity
ligand_receptor
ESR-mediated signaling
Activated PKN1 stimulates transcription of AR (androgen receptor) regulated genes KLK2 and KLK3
Erythropoietin activates Phosphoinositide-3-kinase (PI3K)
Signaling by ERBB2
