Top 50 edge labels by connectivity

Total edges

pathway
Cytokine Signaling in Immune system
Axon guidance
Diseases of signal transduction by growth factor receptors and second messengers
RHO GTPase Effectors
Formation of the dystrophin-glycoprotein complex (DGC)
Metabolism
Adaptive Immune System
ligand_receptor
MAPK1/MAPK3 signaling
MHC class II antigen presentation
Regulation of Homotypic Cell-Cell Adhesion
Regulation of T cell activation by CD28 family
integrin, beta 1 (fibronectin receptor, beta polypeptide, antigen CD29 includes MDF2, MSK12)
GRB2:SOS provides linkage to MAPK signaling for Integrins
Developmental Biology
Initial triggering of complement
Clathrin-mediated endocytosis
Infectious disease
Signaling by the B Cell Receptor (BCR)
Non-integrin membrane-ECM interactions
Death Receptor Signaling
Activation of NMDA receptors and postsynaptic events
Toll Like Receptor 4 (TLR4) Cascade
integrin, alpha V
low density lipoprotein receptor-related protein 1
Cell-Cell communication
GPCR downstream signalling
Signaling by Receptor Tyrosine Kinases
L1CAM interactions
Signaling by BMP
Thrombin signalling through proteinase activated receptors (PARs)
MAP2K and MAPK activation
Protein-protein interactions at synapses
Signaling by RAF1 mutants
Innate Immune System
Fcgamma receptor (FCGR) dependent phagocytosis
Disease
GPCR ligand binding
Signaling by NTRKs
Vesicle-mediated transport
Signaling by GPCR
Signaling by TGF-beta Receptor Complex
Autophagy
Integrin cell surface interactions
Metabolism of proteins
MyD88:MAL(TIRAP) cascade initiated on plasma membrane
VEGFR2 mediated vascular permeability
GABA receptor activation
Late endosomal microautophagy

pathway

Cell-Cell communication
Developmental Biology
ligand_receptor
GPCR downstream signalling
Catenin alpha-1
CD44 molecule (Indian blood group)
Signaling by Receptor Tyrosine Kinases
Signaling by VEGF
Myogenesis
Signaling by NTRKs
GPCR ligand binding
Non-integrin membrane-ECM interactions
VEGFR2 mediated vascular permeability
Disease
Integrin cell surface interactions
Infectious disease
EPHB-mediated forward signaling
Netrin-1 signaling
Signaling by RAF1 mutants
Signaling by GPCR
Metabolism of proteins
GABA receptor activation
MAP2K and MAPK activation
Clathrin-mediated endocytosis
Transmission across Chemical Synapses
Thrombin signalling through proteinase activated receptors (PARs)
Osteopontin
Miscellaneous transport and binding events
Signaling by BMP
GRB2:SOS provides linkage to MAPK signaling for Integrins
Signaling by the B Cell Receptor (BCR)
integrin, alpha V
plexin B2
Regulation of T cell activation by CD28 family
L1CAM interactions
opioid receptor, mu 1
protein tyrosine phosphatase, receptor type, A
Signaling by TGF-beta Receptor Complex
