Top 20 edge labels × category groups
label
Signaling by Receptor Tyrosine Kinases
LR_interaction
Non-integrin membrane-ECM interactions
Cell-cell junction organization
Hemostasis
Developmental Biology
Protein-protein interactions at synapses
L1CAM interactions
RHO GTPase cycle
EPH-Ephrin signaling
MAPK family signaling cascades
CRMPs in Sema3A signaling
Nervous system development
Extracellular matrix organization
G alpha (s) signalling events
Constitutive Signaling by Aberrant PI3K in Cancer
Post-translational modification: synthesis of GPI-anchored proteins
p75 NTR receptor-mediated signalling
Diseases of signal transduction by growth factor receptors and second messengers
Platelet activation, signaling and aggregation
neuron
